ONE DATA  
ONE USE

A close-up photograph of two hands shaking in a firm grip, symbolizing partnership and agreement. The hands are positioned in the center of the frame, with the fingers interlocked. The background is a blurred, light-colored surface, possibly a wall or a window. The overall tone is professional and collaborative.

ONE PARTNER,  
ONE PROJECT

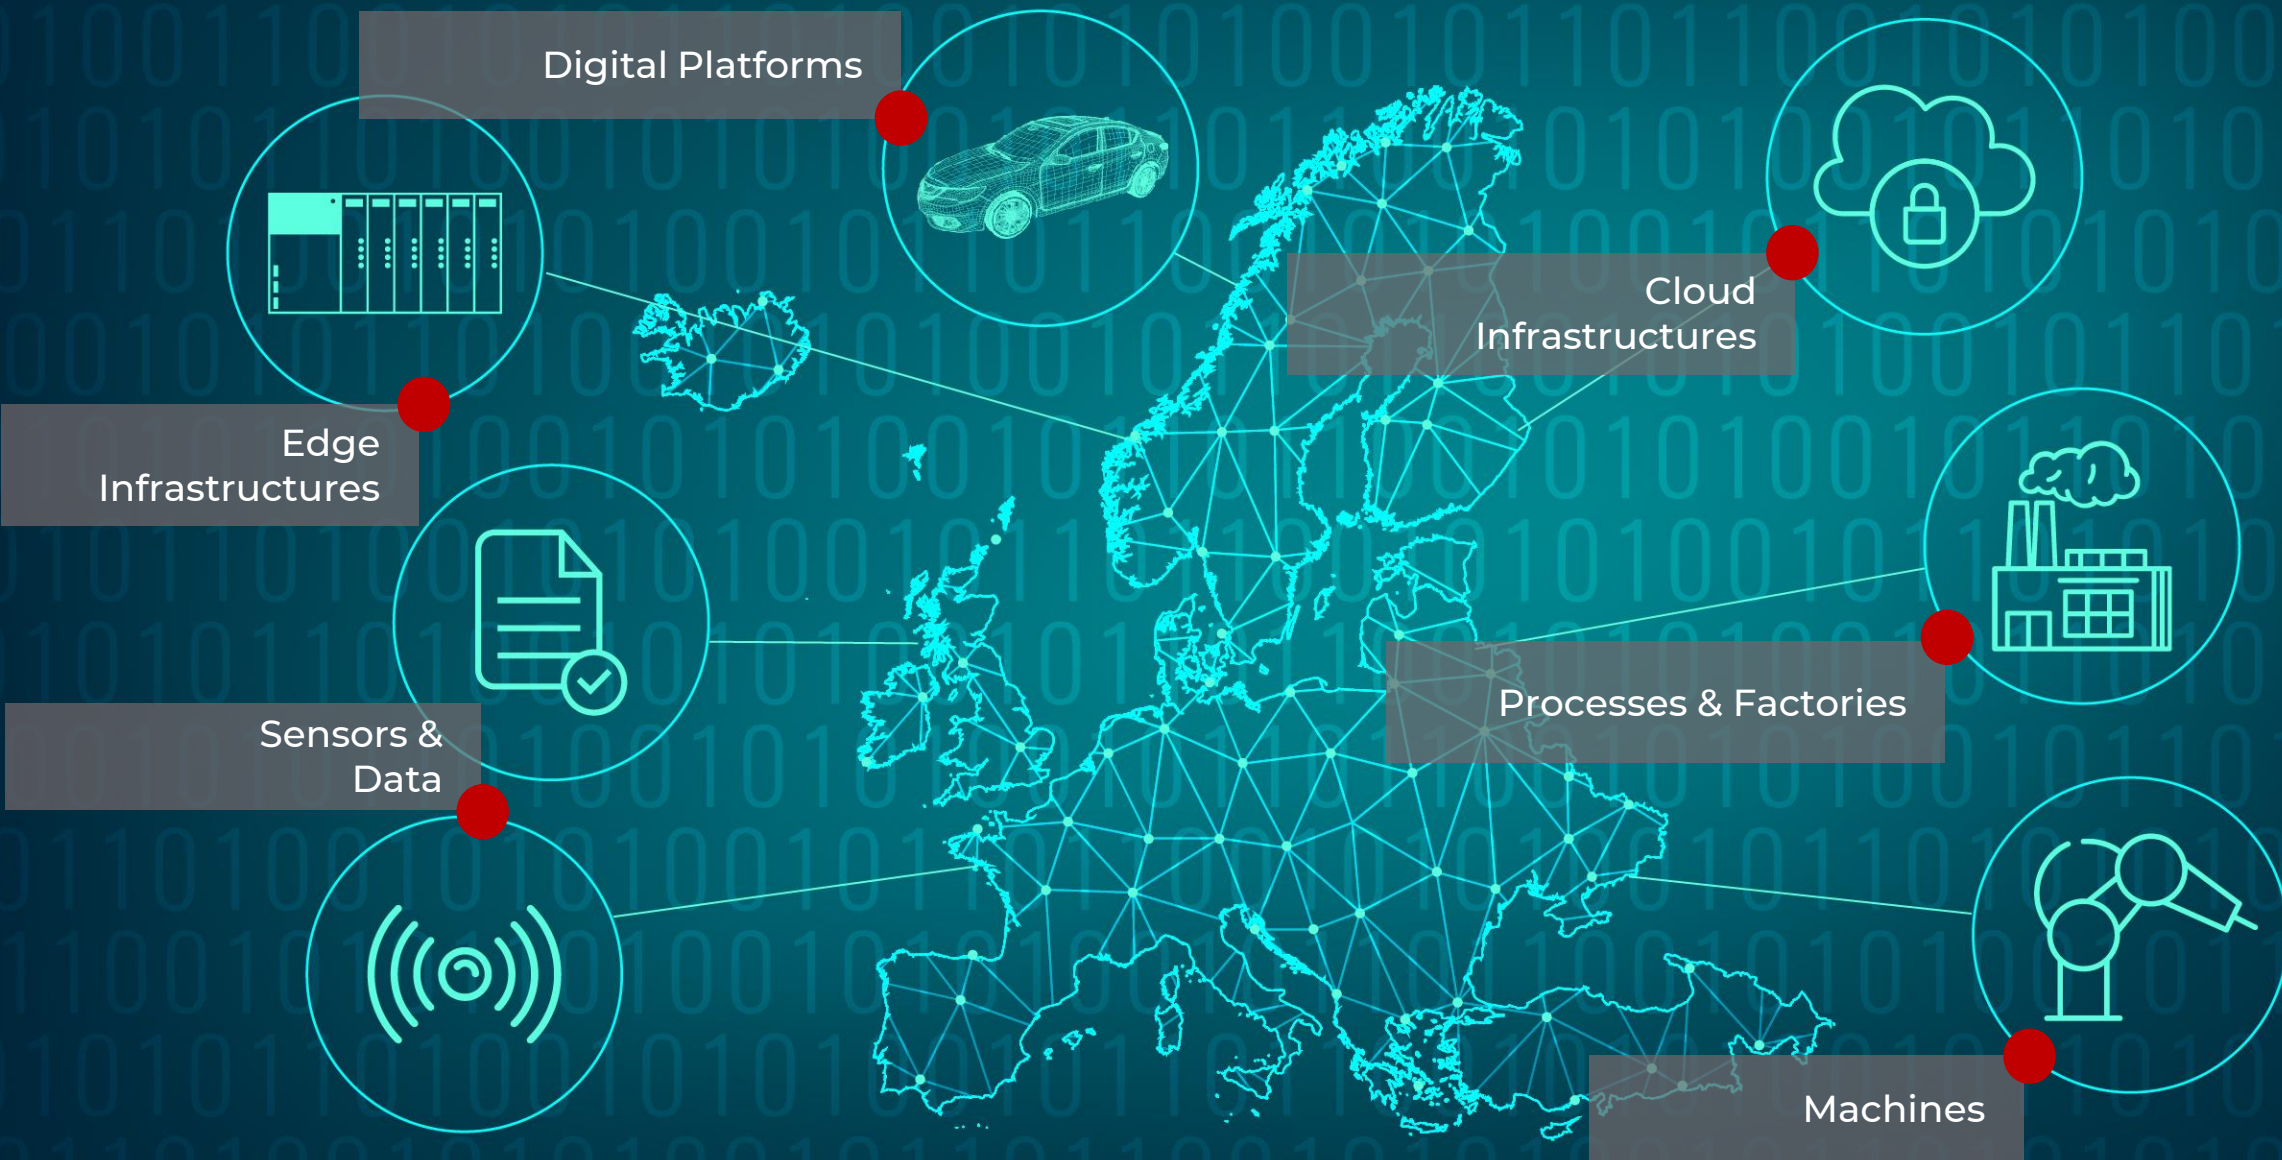

A hand is pointing towards a glowing, circular graphic that features the text "360°" and a circular arrow icon. The graphic is surrounded by concentric, glowing rings and is set against a dark background with bokeh light effects. The overall aesthetic is futuristic and digital.

360°

360° DATA  
INTEGRATION

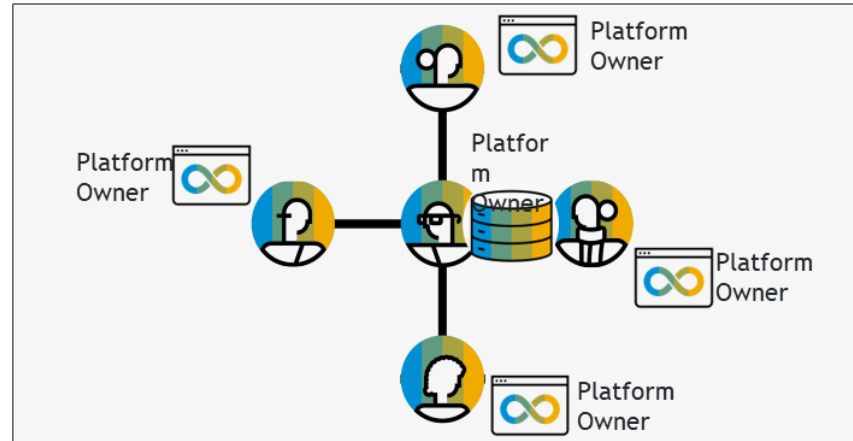

# European Industrial Data Space

# 360° DATA INTEGRATION: GLOBAL MULTILATERAL DATA EXCHANGE

## Traditional Platform

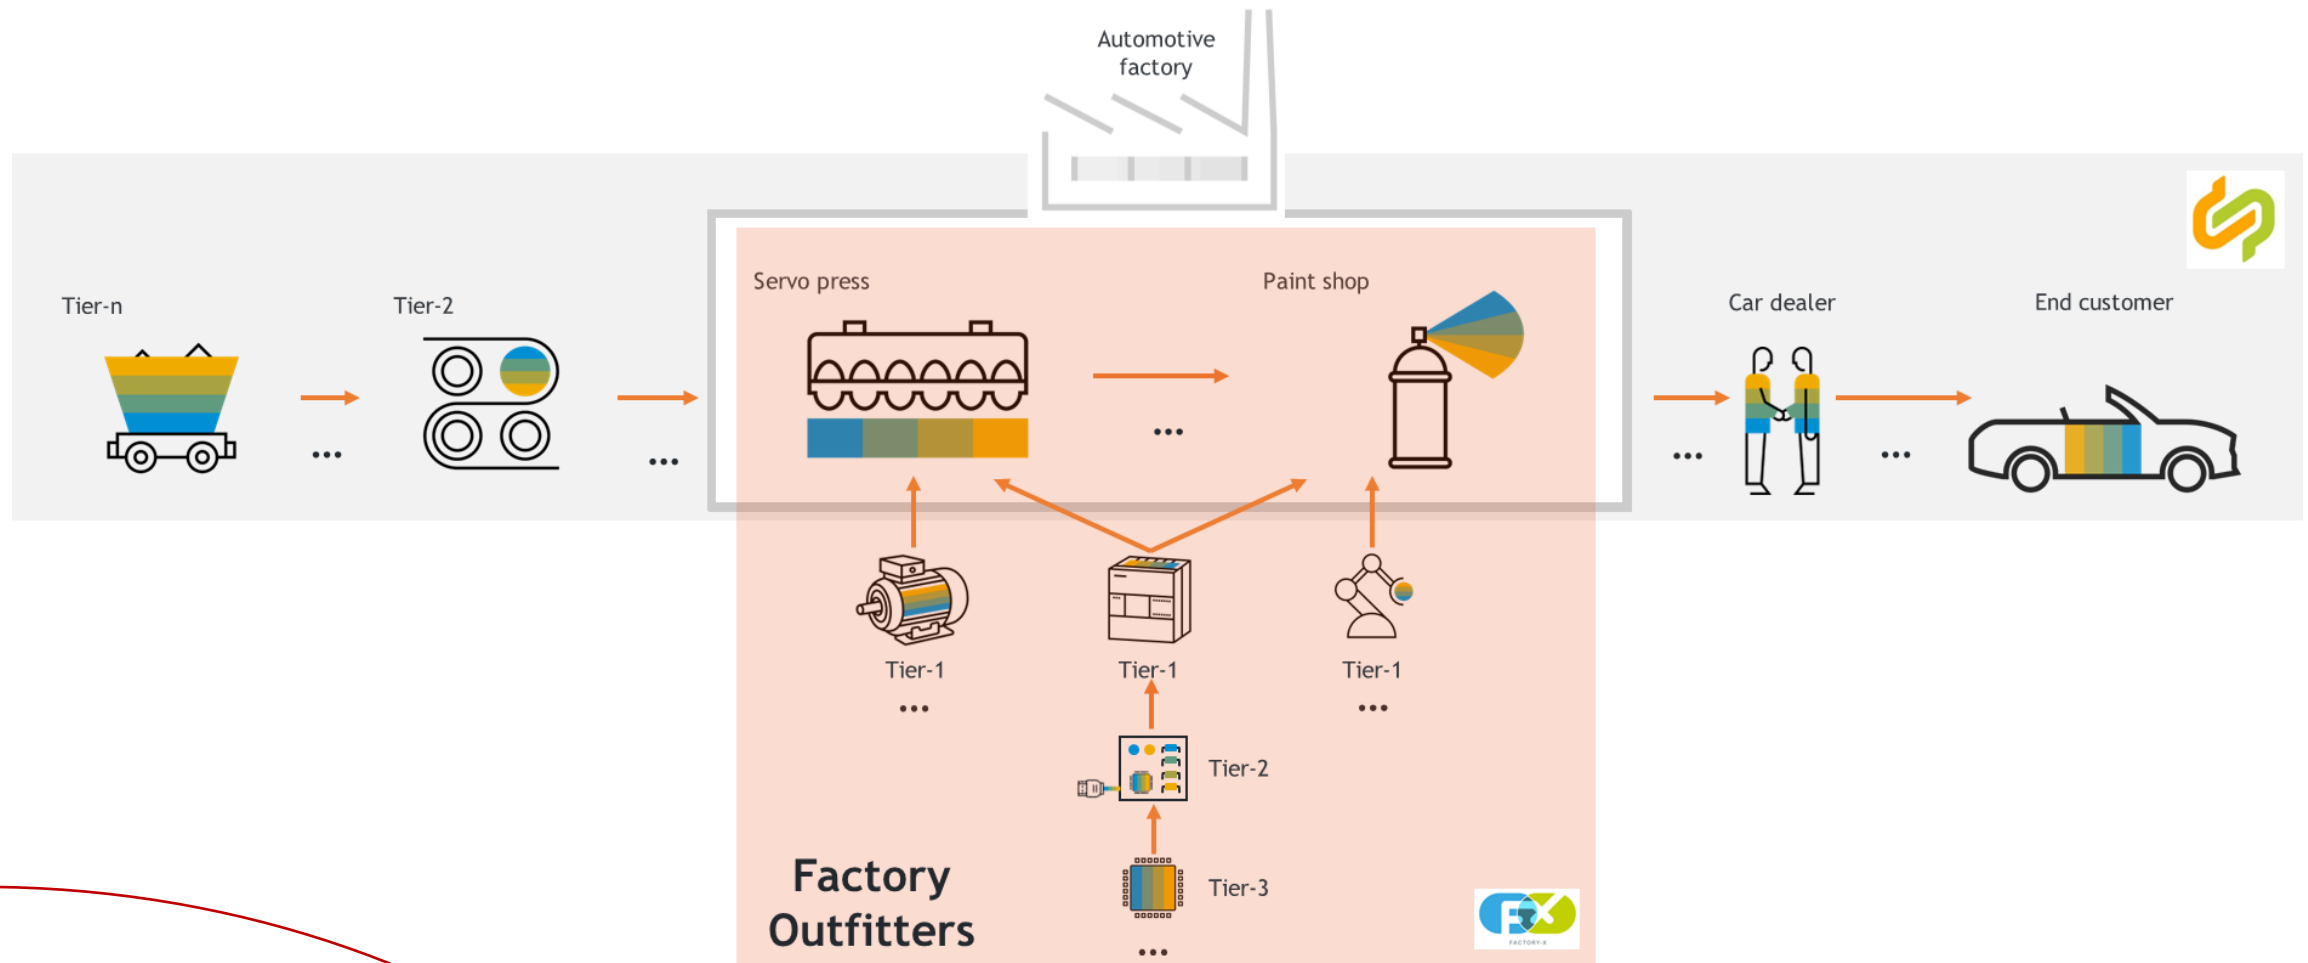

## MJX Manufacturing-X

Applications	Provided by the platform owner all integrated and aligned	Multiple (competing) solutions from various vendors. Each vendor provides and operates his solution
Topology	Central network service	(Slim) federated operating environment provided by an operating company (joint-venture of multiple companies). Data exchange decentral / directly between network participants
Data Persistence	Centrally owned by the platform owner	Decentral data persistence - data resides at data owner who can grant access to others

= data persistence      = application

# 360° DATA INTEGRATION: VERTICAL & HORIZONTAL DATA EXCHANGE

DATA MOVES AT  
THE SPEED OF TRUST

# GLOBAL MANUFACTURING DATA ECOSYSTEMS

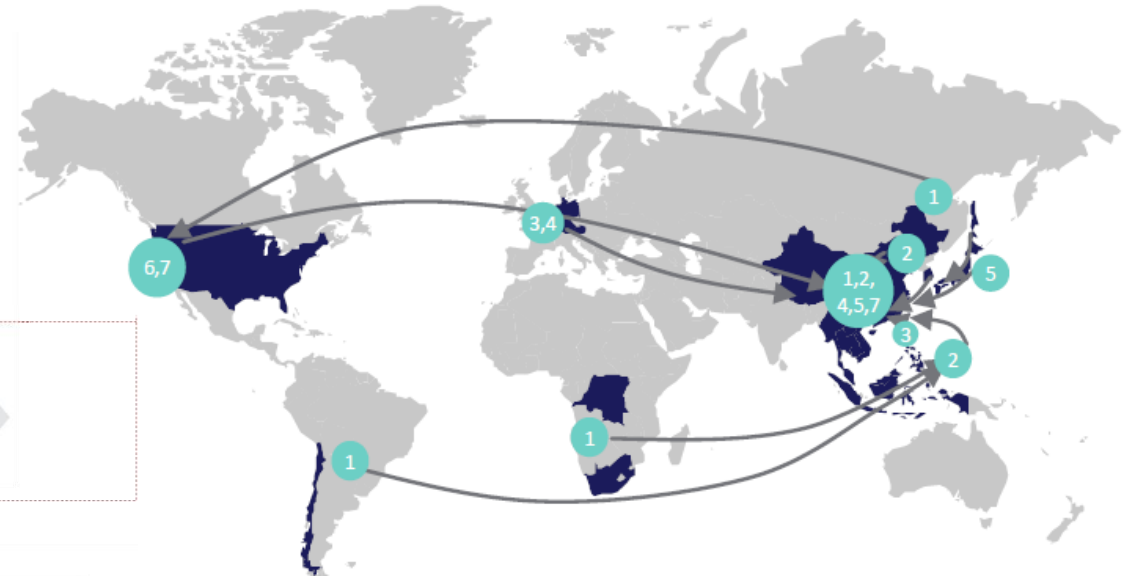

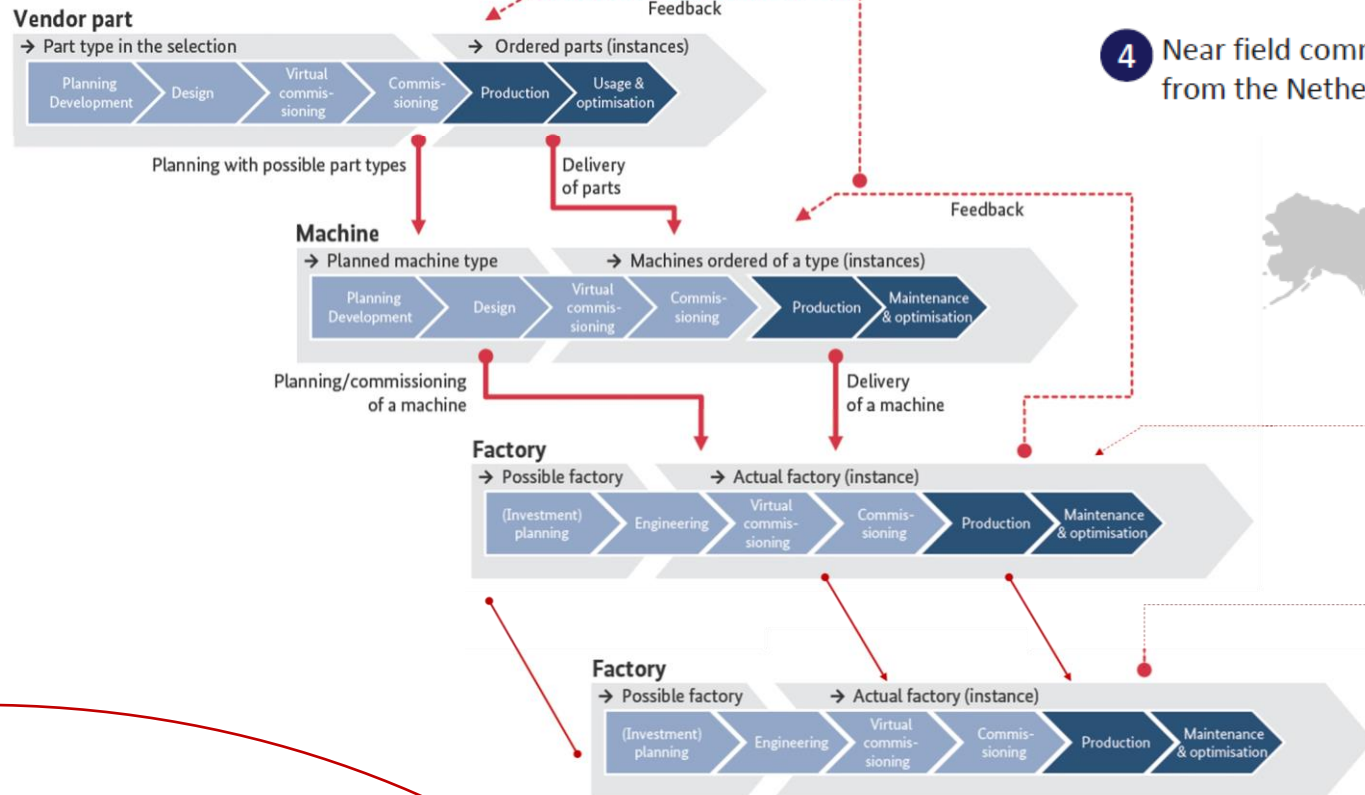

- Manufacturing is a **Global** Activity
- Manufacturing is an **Information** Activity
- Manufacturing is an **Economic** Activity
- Manufacturing is a **National** Activity
- Manufacturing is a **Supply-Chain** Activity
- Manufacturing is an **Individual** Activity
- Manufacturing Affects **Quality of Life**
- Manufacturing has **Global Sustainability** Impact

# GLOBAL MANUFACTURING DATA ECOSYSTEMS

- 1 Metals imported, rare earth metals mined in China<sup>1</sup>
- 2 Screen, flash memory from South Korea
- 3 Accelerometer imported from Germany
- 4 Near field communications controller from the Netherlands
- 5 Camera, Compass, LCD screen imported from Japan
- 6 Wi-Fi chip, Audio Chips imported from USA
- 7 Final assembly and testing in Shenzhen, China

# GLOBAL MANUFACTURING DATA ECOSYSTEMS

Federated/Distributed Data Space Authority

Decentralized Data Space Authority

Embryonic

# GLOBAL MANUFACTURING DATA ECOSYSTEMS

## DATA SPACE FEDERATION

### VISION

IDS provides a **technical framework** to support data sharing based on diverse policies & agreements.

The **IDS Connector** connects participants with the data space.

The connector understands the data space policies and shares data according to these policies.

### Legal & regulatory framework

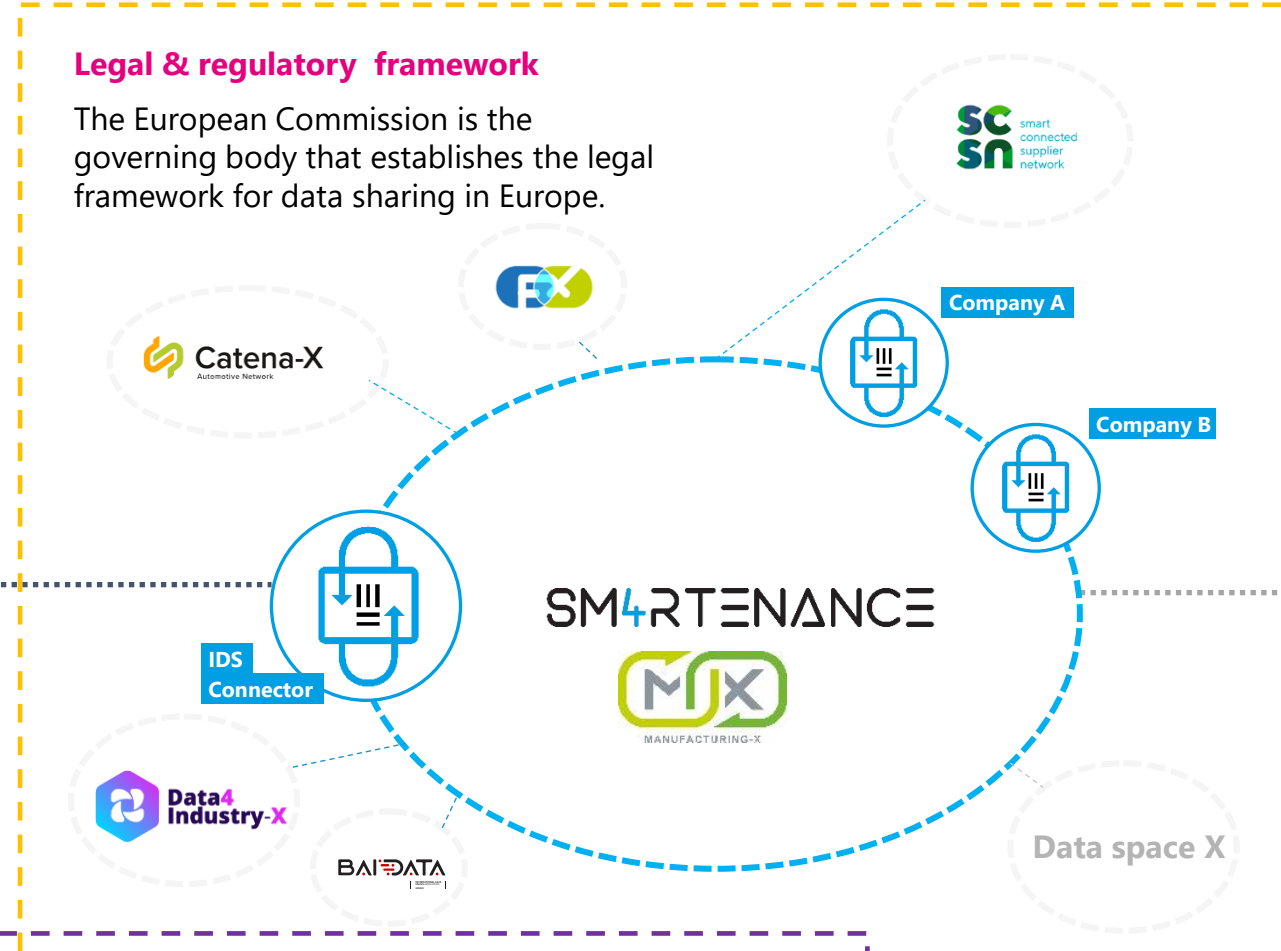

The European Commission is the governing body that establishes the legal framework for data sharing in Europe.

### Data space federation policies

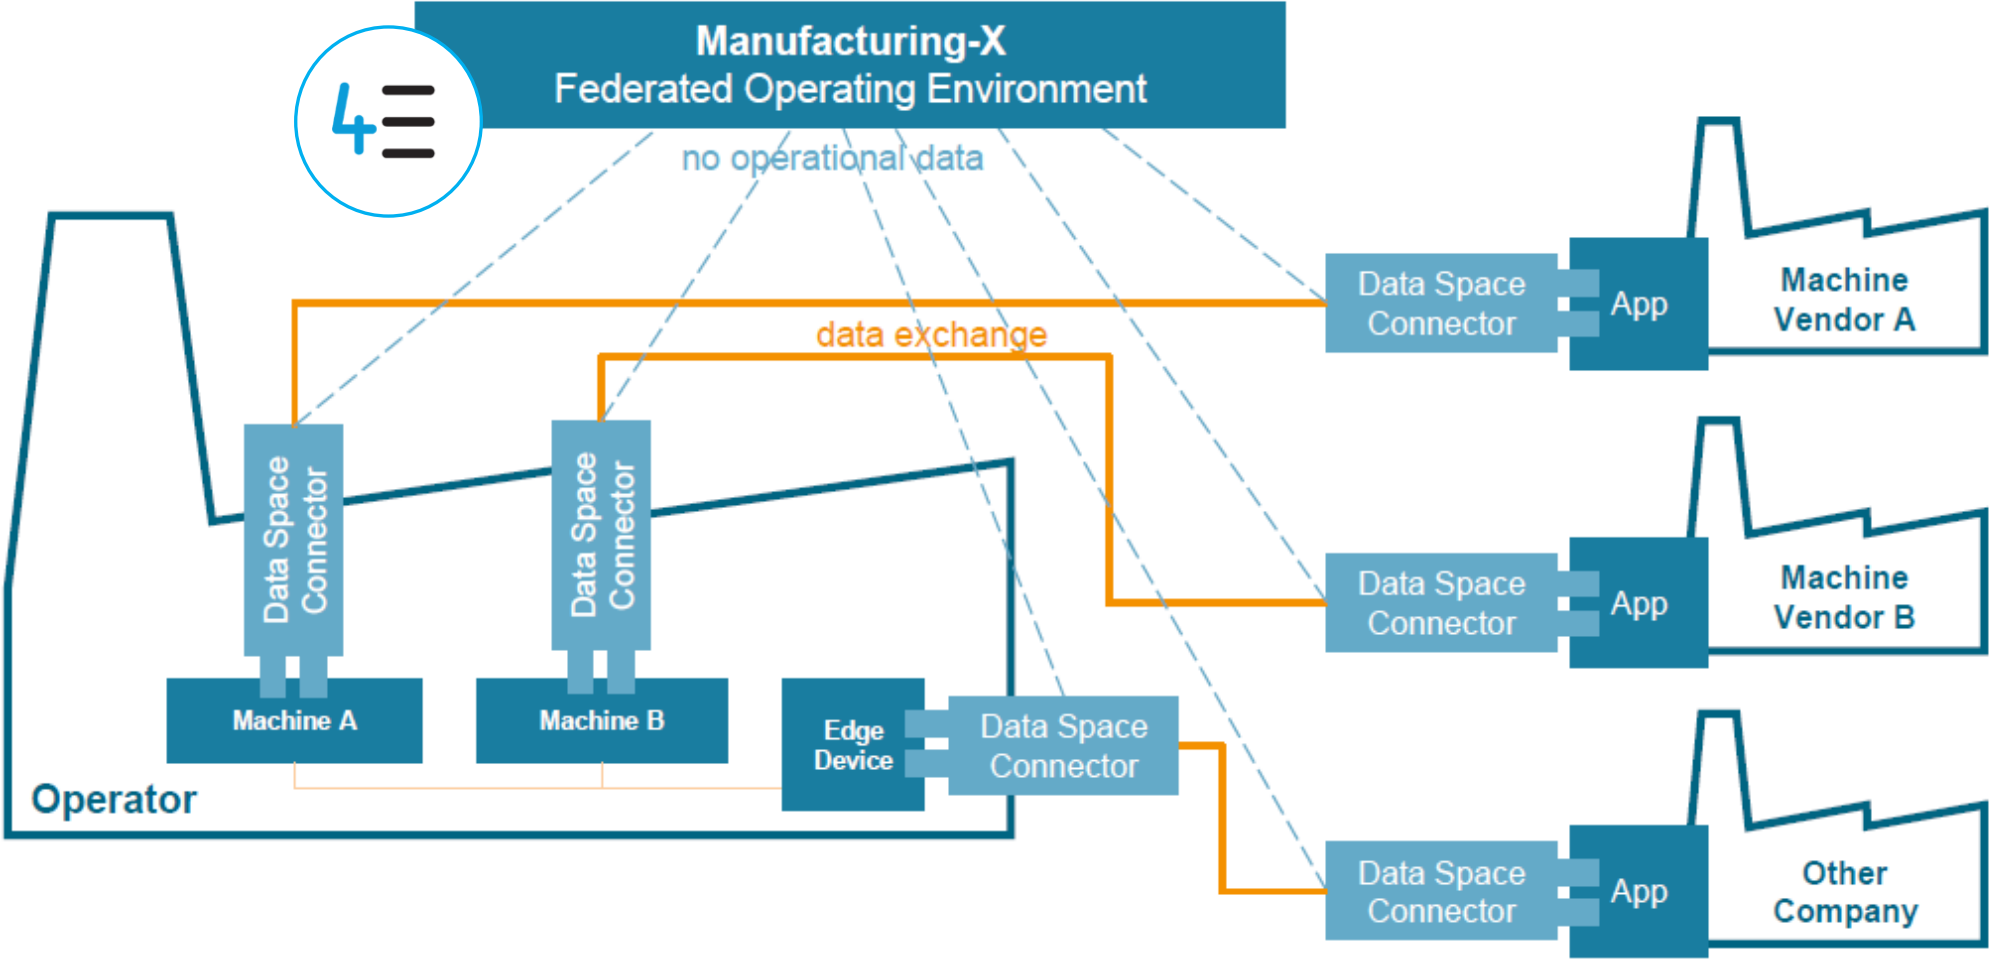

Sm4rtenance **builds and sets the federation & interoperation policies of the data space federation.**

As the **data space federation authority**, it defines the organizational rules and policies for this specific asset 4.0 network federation.

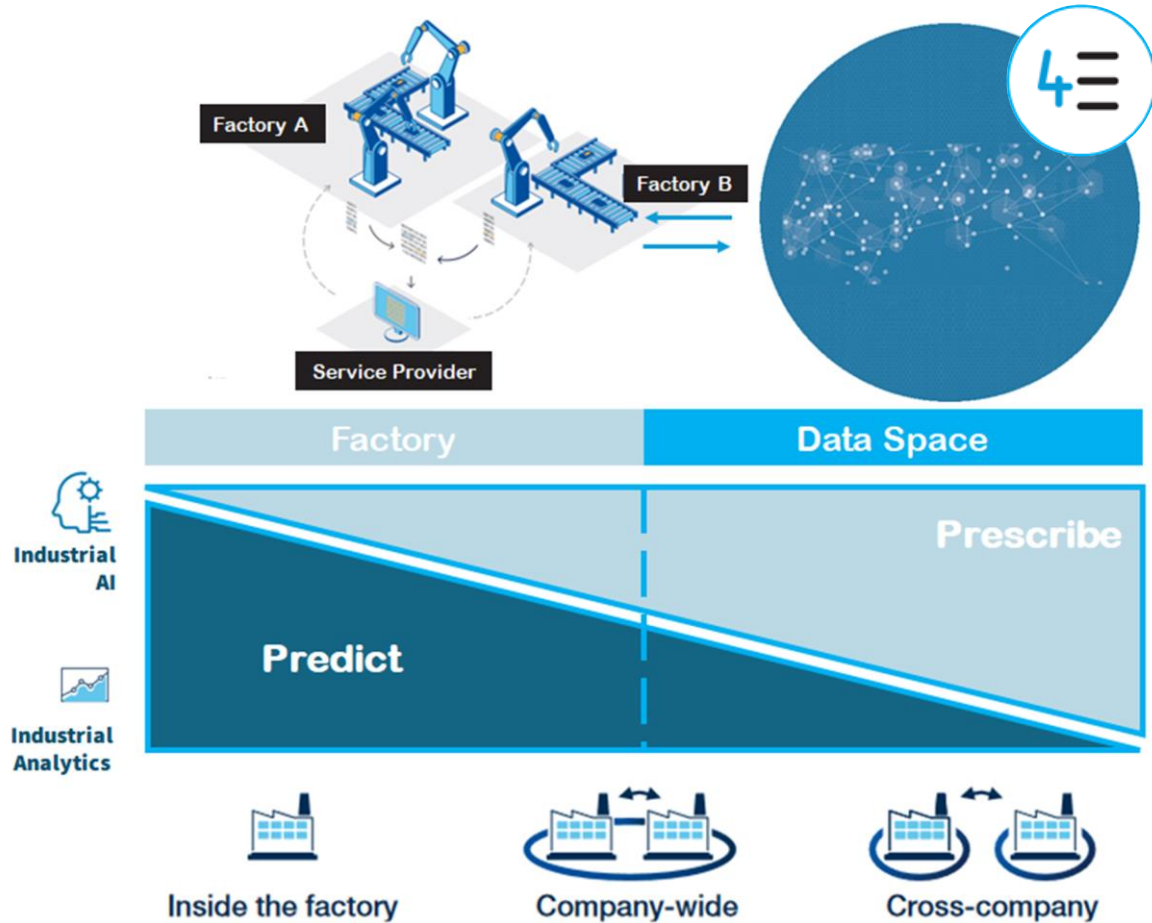

### Trusted & Federated Infrastructure

# GLOBAL MANUFACTURING DATA ECOSYSTEMS

# GLOBAL MANUFACTURING DATA ECOSYSTEMS

	Integrated Toolchains and Collaborative Engineering	Information Update and Change Service	Collaborative Information Logistics
Condition Monitoring led Services	Modular Production	Manufacturing as a Service – On Demand Manufacturing	Autonomous Operation-as-a-Service
Traceability	Energy-Consumption and Load Management	Carbon Footprint Management	Circular Economy

# GLOBAL MANUFACTURING DATA ECOSYSTEMS

## Example: Carbon Footprint

- ~10% of CO2 emissions from industry generated by **own factories**, ~90% by upstream/downstream supply chain <sup>1)</sup>
- To reduce CO2 emissions, transparency along the entire value chain is necessary

## Example: Battery production

- Only if we use the potential of digitalization we can produce batteries more sustainably
- ~ **96% of the ingredients of a battery are recyclable**
- Consistent and transparent use of **digital twins** along the **complete cycle** the design and production will be more **sustainable**

# GLOBAL MANUFACTURING DATA ECOSYSTEM HELIX

ALIGN OBJECTIVES & VISION | AGREE GOVERNANCE & RULES | DESIGN CONCEPTS, PRINCIPLES & ROAD MAPS

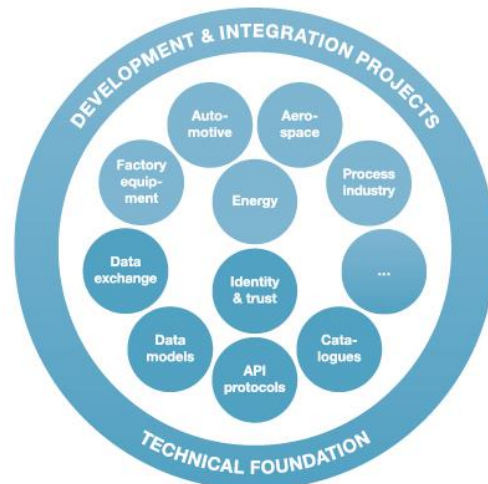

DEVELOP OSS COMPONENTS WITHIN THE COMMUNITY TO SUPPORT USE CASES | INTEGRATE TECHNICAL BUILDING BLOCKS

SECURE AND TRUSTED OPERATION OF ENABLING AND VALUE-CREATING SERVICES IN A DISTRIBUTED MODEL

SME SUPPORT ACTIVITIES | CONSULT & TRAIN | PROVIDE TEST BEDS & TEST SUPPORT | USE CASE ROLL OUT

## ACT LOCAL - THINK GLOBAL

# CHALLENGES GLOBAL MANUFACTURING DATA ECOSYSTEMS

Deployment **needs customization across an infrastructure continuum** from cloud to edge, depending on the applications.

**Information sharing and data-driven collaboration** among manufacturing initiatives across the supply network are becoming more relevant for impactful manufacturing data networks.

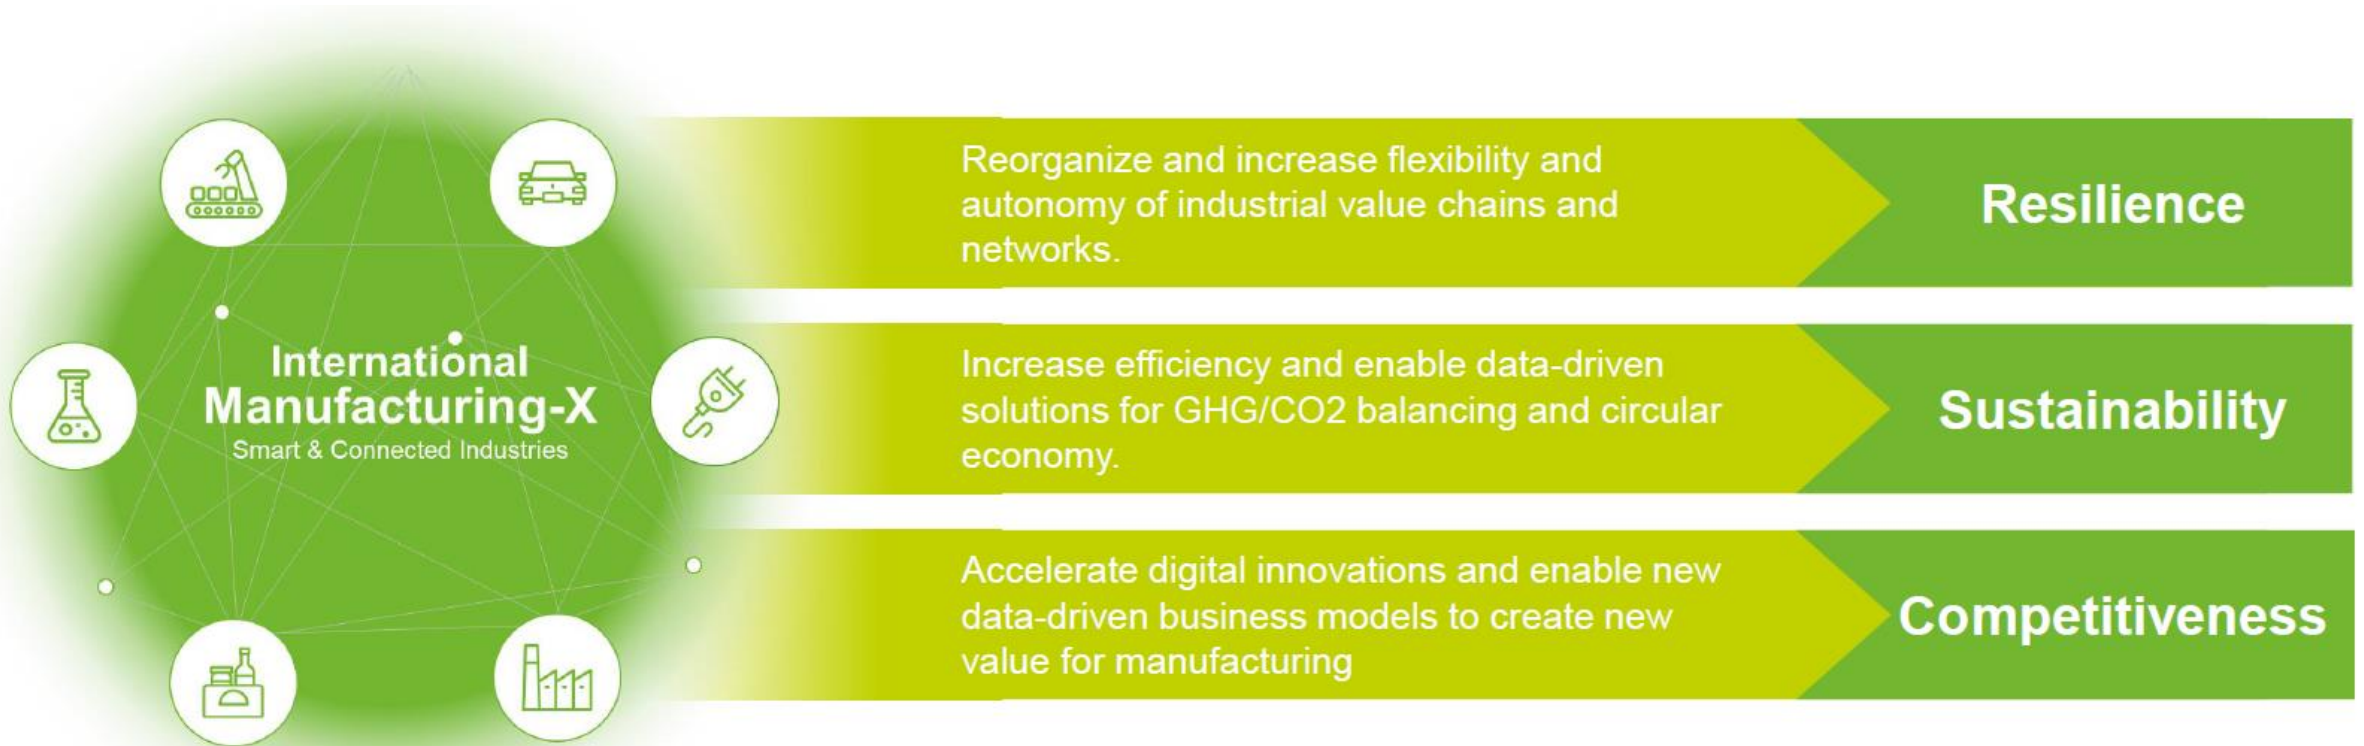

**Harmonized standards** facilitate business scale-up of data ecosystems, which are becoming essential.

No country, no initiative, no company can achieve this on its own!

# INTERNATIONAL MANUFACTURING-X: MAKE DATA WORK

# INTERNATIONAL MANUFACTURING-X: MAKE DATA WORK

# THE IMX COUNCIL: A CO-DESIGN AND UNIFIED EFFORT DRIVEN BY AN INTERNATIONAL ECOSYSTEM

- Develop a joint understanding of data-spaces.
- Define a joint framework for interoperable IMX (technology, standards, etc.) that manufacturing product/solution architecture can build upon.
- Connect and cooperate with other initiatives that are relevant to manufacturing (e.g. energy, logistics, mobility, etc.).
- Discussion of use cases and joint projects where appropriate.
- Drive international harmonization and standardization (consensus based and de-facto based).
- Open exchange of regional initiatives (specific projects, opportunities, etc.).
- Joint conferences and events.
- ... and other topics
